

# JAN MIKO A. GUEVARRA

## Full-Stack Software Developer | Web, Mobile & AI Integrations

Digos City, Philippines | +63 951 457 5745 | janmikoguevarra@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

### PROFESSIONAL SUMMARY

Full-stack software developer building web and mobile applications, APIs, and database-backed workflows for client projects and independent products. Works with React, Next.js, TypeScript, Flutter, PostgreSQL/Supabase, payments, and AI APIs. Handles requirements, implementation, debugging, testing, and release support, with a focus on practical business operations.

### TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Dart, Python, SQL

**Full-Stack:** React, Next.js, Node.js, REST APIs, webhooks, Tailwind CSS, Flutter

**Databases & Backend:** PostgreSQL, Supabase (Auth, Realtime, Storage, RLS), Firebase, SQLite, Cloudflare D1

**Cloud & Integrations:** Vercel, Cloudflare Workers/R2, Stripe, PayMongo, email, maps, QR and PDF workflows

**AI & ML:** OpenAI/Gemini APIs, Python/FastAPI, OCR, model inference and application integration

**Engineering Tools:** Git, GitHub, Vitest, Flutter Test, Postman, npm/pnpm, ESLint, TypeScript, VS Code, Android Studio

### PROFESSIONAL EXPERIENCE

#### Full-Stack Software Developer Intern | JohnV MEDIA

July 2026 - August 2026

- Served as the sole full-stack developer for PicklePark and PesoJar during a supervised practicum, handling frontend, backend, database, and integration work.
- Built and improved PicklePark booking, Open Play and court workflows, payments, facility operations, administration, and reporting using Next.js, TypeScript, and Supabase/PostgreSQL.
- Implemented PesoJar local-first Flutter workflows, synchronization, authentication, Stripe subscription integration, and Cloudflare Worker/D1/R2 services; supported protected administration and release checks.

#### Independent Full-Stack Developer | Client & Product Work

- Build client and independent web/mobile systems: clarify requirements, model data, implement user-facing and administrative workflows, integrate APIs, diagnose defects, and support releases.
- Build TypeScript/React and Flutter applications with PostgreSQL/Supabase or Firebase, including authentication, access controls, validation, real-time updates, and reporting.
- Translate business requirements into data models, role-based workflows, administrative dashboards, and responsive interfaces.
- Integrate REST APIs, webhooks, payments, notifications, maps, file uploads, QR/PDF workflows, and AI services into application features.
- Debug client, server, database, and third-party issues; document changes, verify behavior, and communicate progress and limitations.

## SELECTED PROJECTS

### PicklePark | Live Sports & Facility Operations Platform

*Jun 2026 - Aug 2026*

- Handled full-stack development for booking, Open Play, payments, facility monitoring, and administration in a Next.js/Supabase sports operations platform. Project: [pickleparkph.com](https://pickleparkph.com).

### PesoJar V2 | Personal Finance SaaS

*2026*

- Implemented local-first Flutter finance workflows and synchronization, with Cloudflare Workers/D1/R2 services, account access, Stripe subscription integration, and protected web administration.

### NameAsOne | Independent Identity Platform

*2026*

- Built nameasone.cc with custom handles, public profiles, grouped links/contact actions, and profile editing using Next.js, TypeScript, and Supabase. Public payment actions display owner-provided payment details.

### NomoQR | Multi-Tenant Restaurant SaaS

*2026*

- Developing QR guest ordering and a real-time staff dashboard for kitchen handoff, billing, receipts, menus, tables, and staff operations using Next.js, TypeScript, Supabase, PostgreSQL functions, and RLS.

### InCloud | Client Inventory Web + Mobile System

*2025 - 2026*

- Worked on full-stack implementation for a frozen-food inventory and ordering system, including the Next.js admin, Flutter customer app, and backend stock/order workflows; collaborated with another developer on frontend work.

### HealthCardGo | Client Healthcare SaaS-Style Platform

*2025 - 2026*

- Developed appointment workflows, real-time notifications, role-based dashboards, geographic surveillance views, and reporting using Next.js, TypeScript, and Supabase.

### JobSync | Municipal Government Platform

*2026*

- Built applicant records, AI-assisted ranking, training enrollment, certificate generation, and reporting in a multi-role Next.js/Supabase application.

### MCI Detection System | Research Application

**2026**

- Developed a web and Python/FastAPI research application for MRI/NIfTI processing, model inference, role-based records, analytics, and PDF reports.

## EDUCATION

### BS Computer Science | Cor Jesu College, Inc., Digos City

**Expected 2027**

Fourth-year Computer Science student.
